

JOURNALISTIC VERIFICATION WORKFLOW

Chisholm Broadcast Technology | Ethical Information Gathering Protocol

4-Step Verification Protocol

- 1. Source Classification:** Determine if the claim comes from an eye-witness (Primary) or secondhand report (Secondary).
 - 2. The Rule of Two:** Require at least two independent, unrelated sources before broadcasting any unverified factual claim.
 - 3. Documentary Triangulation:** Cross-reference spoken claims against official records, public schedules, or physical documents.
 - 4. On-Camera Bias Audit:** Identify emotional, personal, or financial stakes involved before editing quotes into a package.

Source Risk & Verification Matrix

Source Type	Risk Level	Required Action	Broadcast Standard
Official Document	Low	Verify issuing authority & date stamp	Single document confirmation permitted
Named Eyewitness	Medium	Cross-reference with 2nd source or video	Requires full name & title on screen
Social Media Tip	High	Trace original uploader; interview creator	Never air screenshot without direct check
Anonymous Lead	Critical	Obtain editor approval; find physical proof	Use only when safety or privacy is at risk

Standards Alignment

CTE.Standard.CTB: .11.01: Demonstrate ethical information gathering, bias detection, source verification, and fact-checking protocols in news production.
